

Listing of Claims:

1. (Previously Presented) A method comprising:
adding a plurality of files to a presentation profile;
specifying a set of individual printing characteristics with respect to each of the files;
specifying a set of individual packaging characteristics with respect to each of the files; and
responsive to a single print request, printing a presentation package including each of the files in the presentation profile based on the individual packaging characteristics and individual printing characteristics corresponding to each of the files.
2. (Original) A method as recited in claim 1, wherein a first subset of the files were generated using a first computer program application, and wherein a second subset of the files were generated using a second computer program application that is different than the first computer program application.
3. (Previously Presented) A method as recited in claim 1, wherein specifying the packaging characteristics further comprises:
identifying a first subset of the files that are to be included in the presentation package and a second subset of the files that are to be included in a general distribution package, wherein the second subset of files is different than the first subset of files.

4. (Previously Presented) A method as recited in claim 1, wherein specifying the packaging characteristics further comprises:

selecting one or more options to identify how at least one subset of the files of the presentation package are packaged, the one or more options comprising stapling the at least one subset of files together and collating the at least one subset of files.

5. (Previously Presented) A method as recited in claim 1, wherein specifying the packaging characteristics further comprises:

identifying a subset of files that are to be included in a general distribution package; and

indicating a number of copies to print with respect to the subset of the files that are to be included in the general distribution package.

6. (Previously Presented) A method as recited in claim 1, wherein specifying the packaging characteristics further comprises:

indicating a number of copies to print with respect to a subset of the files that are to be included in the presentation package.

7. (Original) A method as recited in claim 1, wherein specifying the printing characteristics further comprises:

identifying a specific printer to print each of the files.

8. (Original) A method as recited in claim 1, wherein specifying the printing characteristics further comprises:

indicating which of a plurality of print media supply bins are to be used by a printer to print individual ones of the files.

9. (Previously Presented) A computer-readable medium comprising computer-executable instructions to print a plurality of files in a presentation, the computer-executable instructions comprising instructions for:

adding a plurality of files to a presentation profile;

specifying a set of individual printing characteristics with respect to each of the files;

specifying a set of individual packaging characteristics with respect to each of the files; and

responsive to a single print request, printing a presentation package including each of the files in the presentation profile based on the individual packaging characteristics and individual printing characteristics corresponding to each of the files.

10. (Original) A computer-readable medium as recited in claim 9, wherein a first subset of the files were generated using a first computer program application, and wherein a second subset of the files were generated using a second computer program application that is different than the first computer program application.

11. (Previously Presented) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

identifying a first subset of the files that are to be included in the presentation package and a second subset of the files that are to be included in a general distribution package, wherein the second subset of files is different than the first subset of files.

12. (Previously Presented) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

selecting one or more options to identify how at least one subset of the files of the presentation package are packaged, the one or more options comprising stapling the at least one subset of files together and collating the at least one subset of files.

13. (Previously Presented) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

identifying a subset of files that are to be included in a general distribution package; and

indicating a number of copies to print with respect to the subset of the files that are to be included in the general distribution package.

14. (Previously Presented) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

indicating a number of copies to print with respect to at least a first subset of the files that are independent of at least a second subset of the files that are to be included in the presentation package.

15. (Original) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the printing characteristics further comprising instructions for:

identifying a specific printer to print each of the files.

16. (Original) A computer-readable medium as recited in claim 9, wherein the instructions for specifying the printing characteristics further comprising instructions for:

indicating which of a plurality of print media supply bins are to be used by a printer to print individual ones of the files.

17. (Previously Presented) A computing device comprising:

a memory comprising computer-executable instructions for automatically printing each file in a presentation profile;

a processor that is operatively coupled to the memory, the processor being configured to fetch and execute the computer-executable instructions from the memory, the computer-executable instructions comprising instructions for:

adding a plurality of files to a presentation profile;

specifying a set of individual printing characteristics with respect to each of the files;

specifying a set of individual packaging characteristics with respect to each of the files; and

responsive to a single print request, printing a presentation package including each of the files in the presentation profile based on the individual packaging characteristics and individual printing characteristics corresponding to each of the files.

18. (Original) A computing device as recited in claim 17, wherein a first subset of the files were generated using a first computer program application, and wherein a second subset of the files were generated using a second computer program application that is different than the first computer program application.

19. (Previously Presented) A computing device as recited in claim 17, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

identifying a first subset of the files that are to be included in the presentation package and a second subset of the files that are to be included in a general distribution package, wherein the second subset of files is different than the first subset of files.

20. (Previously Presented) A computing device as recited in claim 17, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

selecting one or more options to identify how at least one subset of the files of the presentation package are packaged, the one or more options comprising stapling the at least one subset of files together and collating the at least one subset of files.

21. (Previously Presented) A computing device as recited in claim 17, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

identifying a subset of files that are to be included in a general distribution package; and

indicating a number of copies to print with respect to the subset of the files that are to be included in the general distribution package.

22. (Previously Presented) A computing device as recited in claim 17, wherein the instructions for specifying the packaging characteristics further comprising instructions for:

indicating a number of copies to print with respect to at least a first subset of the files that are independent of at least a second subset of the files that are to be included in the presentation package.

23. (Original) A computing device as recited in claim 17, wherein the instructions for specifying the printing characteristics further comprising instructions for:

Identifying a specific printer to print each of the files.

24. (Original) A computing device as recited in claim 17, wherein the instructions for specifying the printing characteristics further comprising instructions for:

indicating which of a plurality of print media supply bins are to be used by a printer to print individual ones of the files.

25. (Previously Presented) A user interface comprising:

a first area for adding a plurality of files to a presentation profile;

a second area for specifying a set of individual packaging characteristics with respect to individual each of the files;

a third area for indicating a set of individual printing characteristics with respect to individual each of the files; and

a fourth area for printing a presentation package including each of the files in the presentation profile in response to a single print request, the printing being based on the individual packaging characteristics and individual printing characteristics corresponding to each of the files.

26. (Original) A user interface as recited in claim 25, wherein a first subset of the files are generated using a first computer program application, and wherein a second subset of the files are generated using a second computer program application that is different than the first computer program application.

27. (Previously Presented) A user interface as recited in claim 25, wherein the second area for specifying the packaging characteristics further comprises:

a fifth area for identifying a first subset of the files that are to be included in the presentation package and a second subset of the files that are to be included in a general distribution package, wherein the second subset of files is different than the first subset of files.

28. (Previously Presented) A user interface as recited in claim 25, wherein the second area for specifying the packaging characteristics further comprises:

a fifth area for selecting one or more options to identify how at least one subset of the files of the presentation package are packaged, the one or more options comprising stapling the at least one subset of files together and collating the at least one subset of files.

29. (Previously Presented) A user interface as recited in claim 25, wherein the second area for specifying the packaging characteristics further comprises:

a fifth area for identifying a subset of files that are to be included in a general distribution package and indicating a number of copies to print with respect to the subset of the files that are to be included in the general distribution package.

30. (Previously Presented) A user interface as recited in claim 25, wherein the second area for specifying the packaging characteristics further comprises:

a fifth area for indicating a number of copies to print with respect to at least a first subset of the files that are to be included in the presentation package.

31. (Original) A user interface as recited in claim 25, wherein the third area for specifying the printing characteristics further comprises:

a fifth area for identifying a specific printer to print each of the files.

32. (Original) A user interface as recited in claim 25, wherein the third area for specifying the printing characteristics further comprises:

a fifth area for indicating which of a plurality of print media supply bins are to be used by a printer to print individual ones of the files.
